

EROSEAL® POLY

APPLICATIONS

- Unsealed rural roads
- Farm roads and access tracks
- Environmental and stockpile management

Polymer-Based Dust Control Solution

EROSEAL POLY Dust Suppression Fluid is an eco-friendly, robust, and enduring polymer-based dust control solution. Crafted for application on tracks and open areas susceptible to dust generation, it drastically minimises dust emission to nearly zero.

Continued usage not only curtails dust generation but also aids in preserving the treated surfaces and enhancing water resistance.

EROSEAL POLY is also available in a green variant, specifically designed for visual spraying applications. This option facilitates easy tracking of treated areas, ensuring comprehensive coverage and efficient use of the product.

Advantages

- Advanced formulation
- Long-lasting protection
- Environmentally friendly
- Biodegradable and non-toxic
- Versatile application
- Cost-effective solution
